PROFESSIONAL SUMMARY

Since 2024, my role has been mostly web and software development: designing, building and maintaining in-house web applications and corporate websites using ASP.NET (C#), PHP, JavaScript, Microsoft SQL Server and MySQL/MariaDB across the full software development lifecycle, from system and database design to UAT, production deployment and ongoing support. I have replaced manual Excel, paper and email workflows with centralised systems and brought corporate website development in-house, and I am now seeking a dedicated Web/Software Developer role.

With 6+ years in IT operations and infrastructure support across corporate and manufacturing environments (networking, VLANs, Active Directory, Linux, IIS), I can deploy and maintain the systems I build. Currently expanding into AI workflow automation (n8n, Power Automate), Power BI and IIoT monitoring (Node-RED, MQTT) for Industry 4.0.

TECHNICAL SKILLS

Programming & Web: ASP.NET (C#), PHP, JavaScript, HTML5, CSS3, JSON

Databases: Microsoft SQL Server, MySQL/MariaDB, PDO and mysqli prepared statements, database triggers, database design, phpMyAdmin

Systems Development: SDLC, system design, JSON APIs, UAT, production deployment, role-based access control (RBAC), audit logging, rate limiting, XSS sanitisation (DOMPurify), Excel/PDF reporting (PhpSpreadsheet, SheetJS, Dompdf)

Servers & Deployment: IIS, Windows Server, Linux, Apache, nginx, Synology NAS (Web Station, DSM Task Scheduler), HTTPS, environment configuration (.env)

Web & CMS: WordPress, Elementor, cPanel, Yoast SEO, UI/UX

Automation & Analytics: n8n, Microsoft Power Automate, Make.com, Power BI, Google Sheets

IoT & Monitoring: Raspberry Pi, Node-RED, MQTT, Modbus, OPC UA, FUXA SCADA, NEMS network monitoring

Networking & Infrastructure: Active Directory, VLAN, IP addressing, LAN cabling, switches, wireless access points, MikroTik, routers, VPN, CCTV, door access systems

Application Support: Troubleshooting, incident handling, root-cause analysis, user support, system maintenance

Tools: Visual Studio 2022, Composer, Microsoft Office

WORK EXPERIENCE

Information Technology Officer Jun 2022 – Present

HeveaBoard Berhad, Gemas, Negeri Sembilan

Systems & Web Development

- **Medical Management System** *(ASP.NET C#, SQL Server, IIS)* **–** Rebuilt the legacy medical application from scratch as a web-based system, now actively used on the internal network and by external panel clinics through VPN; added reporting, stronger security and new features.
- **Container Inspection System** *(PHP 8.2, JavaScript, MariaDB, Synology)* **–** Developed and launched a live system that replaced Excel records, paper inspection forms, scattered photos and email chains between departments; all departments involved now access inspection results, photo evidence and loading details in one place. Built with vanilla PHP JSON APIs and PDO parameterised queries, featuring 6-role access control, audit logging, rate limiting, XSS sanitisation (DOMPurify), photo uploads and Excel reporting (SheetJS, PhpSpreadsheet).
- **Diesel Operations Management System** *(PHP 8.2, JavaScript, MariaDB, Synology)* **–** Developed a centralised system, currently in User Acceptance Testing (UAT), replacing manual forms and separate Excel records for diesel receiving, issuing and tank transfers, and consolidating multi-department transactions into one database. Features role-based access, MariaDB triggers to lock closed months, digital signatures (HTML Canvas), client-side photo compression and Excel/PDF reports (PhpSpreadsheet, Dompdf).

- **Corporate Websites (HeveaBoard Berhad & HeveaPac Sdn. Bhd.)** *(WordPress, cPanel)* **–** Took over the HeveaBoard website from an external vendor and modernised both corporate websites: redesigned UI/UX, built new corporate and product pages and improved SEO for search visibility and global reach. Continue to maintain the HeveaBoard site; handed over the HeveaPac site after modernisation.

IT Infrastructure & Support

- **IT Support & Infrastructure –** Provide technical support across office and production environments, including PC/laptop setup, domain joining, hardware and software troubleshooting and printers. Manage IP addressing across multiple VLANs and maintain LAN cabling, switches, wireless access points, CCTV, door access and communication devices.
- **Network Monitoring –** Deployed a Linux-based network monitoring system (NEMS) giving IT visibility of servers, network switches, internet connectivity and connected devices.
- **Digital Signage (HeveaPac Canteen) –** Implemented a Raspberry Pi digital signage solution using Yodeck, enabling staff to manage video content and playback schedules without IT assistance.

Information Technology Technician Nov 2018 – May 2022
MicroIT Computer & Service, Segamat, Johor

- Provided on-site IT support to residential, commercial, industrial, education and government customers, diagnosing and resolving desktop, laptop, printer, software and connectivity issues.
- Installed and configured network infrastructure at customer premises, including LAN cabling, IP addressing, routers and modems.
- Installed, configured and troubleshot CCTV surveillance and door access control systems.

Information Technology Internship Student Jan 2016 – Apr 2016
Pejabat Daerah Kecil dan Tanah Gemas (PDKG), Gemas, Negeri Sembilan

- **Room Booking System –** Developed an internal room booking and information system to manage room reservations and office information.
- **IT Support –** Assisted with PC and server troubleshooting, data backups and user technical support.

Clerk (Contract) Dec 2013 – Jun 2014
Malaysia Building Society Berhad (MBSB), Kuala Lumpur

- Processed Personal Financing-i (PF-i) applications, managed documents and handled customer enquiries using internal systems and Microsoft Office.

TRAINING & PROJECTS

AI & Automation Training May 2026
HeveaBoard Berhad

- **Project –** Built a Supplier Quality Control Automation System using n8n, JavaScript, Google Sheets, Gmail and Power BI, automating defect-rate calculation, Pass/Fail/Revoke classification, email notifications and dashboard reporting for 62 inspection records across 8 suppliers.
- Covered Generative AI, agentic AI, LLM fundamentals, prompting, APIs, workflow debugging and automation security, with hands-on use of n8n, Make.com and Microsoft Power Automate.

Utilities Monitoring Systems for IR 4.0 Oct 2026
HeveaBoard Berhad

- Built IIoT monitoring flows using Node-RED, MQTT, Modbus, OPC UA and FUXA SCADA, including JavaScript payload processing, machine-status logic, Raspberry Pi monitoring and dashboard visualisation.

EDUCATION

Certificate in Computer Software Applications (Sijil Kolej Komuniti) 2016
Kolej Komuniti Segamat 2, Segamat, Johor

Malaysian Skills Certificate (SKM) Level 2 & 3 – Mechatronics 2012
BJ Automation Centre, Gemas, Negeri Sembilan

Sijil Pelajaran Malaysia (SPM) 2010
SMK Tuanku Abdul Rahman, Gemas, Negeri Sembilan
